# NVISICON 2026

## NEUROVASCULAR INTERVENTIONS SOCIETY OF INDRAPRASTHA

### The Summer Colloquium

## Basics and Precision in Stroke NeuroIntervention

27th - 28th June 2026 | India Habitat Centre, New Delhi

# Scientific Programme

Registration - 9:00 AM onwards

### Day 1 | Session -1 | Basics of Neurointervention

| Time                                                                                                 | Topic                                                         | Speaker                |
|------------------------------------------------------------------------------------------------------|---------------------------------------------------------------|------------------------|
| <b>Chairperson : Srinivasan Paramasivam, Anita Jagetia, Rahul Kumar, Rajesh Kumar</b>                |                                                               |                        |
| 09:30-09:45 Hrs                                                                                      | Case presentation: Beyond device failure                      | Bikram Shakya          |
| 09:45-10:00 Hrs                                                                                      | Discussion on the case                                        |                        |
| 10:00-10:15 Hrs                                                                                      | Neurovascular Devices Basic and compatibility                 | Kaushik Sunder         |
| 10:15-10:30 Hrs                                                                                      | Neurovascular Pharmacology & interactions                     | Vivek Nambiar          |
| 10:30-10:45 Hrs                                                                                      | Difficult Femoral Puncture: How do I do it                    | Anita Jagetia          |
| 10:45-11:00 Hrs                                                                                      | Trans-Radial Access: Panacea or Hype?                         | Rahul Kumar            |
| 11:00-11:20 Hrs                                                                                      | Discussion on four presentations                              |                        |
| <b>Chairperson : Gurbachan Singh, Shailesh Jain, Daljit Singh, Madhukar T Nayak, Shrikant Sharma</b> |                                                               |                        |
| 11:20-11:30 Hrs                                                                                      | Case presentation: (Demonstration of steps of a complete DSA) | Ajay Sharma            |
| 11:30-11:40 Hrs                                                                                      | Discussion on the case                                        |                        |
| 11:40-11:55 Hrs                                                                                      | Need for stable access and DAC: Importance & what is optimum  | Sumit Goyal            |
| 11:55-12:10 Hrs                                                                                      | Retained Device; Salvage                                      | Srinivasan Paramasivam |
| 12:10-12:30 Hrs                                                                                      | Hardware selection and behaviour during the case              | Gurbachan Singh        |
| 12:30-12:45 Hrs                                                                                      | CBCT Imaging 10 years, 3D,6, D,9D                             | Rahul Kumar            |
| 12:45-13:00 Hrs                                                                                      | Discussion                                                    |                        |
| <b>13:00-13:30 Hrs Lunch Break</b>                                                                   |                                                               |                        |

## Day 1 | Session -2

| Time                                                                           | Topic | Speaker |
|--------------------------------------------------------------------------------|-------|---------|
| <b>Chairperson : Shishir Pandey, Varun Bhargava, Rashmi Saraf, Ashish Goel</b> |       |         |

|                  |                                                |                  |
|------------------|------------------------------------------------|------------------|
| 13:30-13:40 Hrs  | Case presentation MMA embolization             | Sachin Tribhuvan |
| 13:40-13:50 Hrs  | Discussion on the case                         |                  |
| 13:50-14:05 Hrs  | MMA embolization experience & Current evidence | Vikas Gupta      |
| 14:05- 14:20 Hrs | Basics of Neurointervention: A must know       | Shailesh Jain    |
| 14:20-14:35 Hrs  | Case presentation: MT- in ICAD                 | Sagnik Roy       |
| 14:35-14:50 Hrs  | Discussion on the case                         |                  |

## Day 1 | Session -2

| Time                                                                  | Topic | Speaker |
|-----------------------------------------------------------------------|-------|---------|
| <b>Chairperson : K K Jindal, Rahul Jain, K S Anand, Ashutosh Garg</b> |       |         |

|                 |                                               |                  |
|-----------------|-----------------------------------------------|------------------|
| 14:50-15:05Hrs  | PC Stroke: Hits & Misses                      | Suman Kushwaha   |
| 15:05-15:20 Hrs | MT After 24 hours                             | Mukesh Sharma    |
| 15:20-15:35 Hrs | How Large is LARGE for aspiration catheter    | Biplab Das       |
| 15:35-15:50 Hrs | Case Presentation: Stroke balloon angioplasty | Simranjeet Singh |
| 15:50-16:05 Hrs | Discussion                                    |                  |

## Day 1 | Session -3

| Time                                                                                   | Topic | Speaker |
|----------------------------------------------------------------------------------------|-------|---------|
| <b>Chairperson : Yogendra Kumar Verma, Chandan Mishra, Vinay Goyal, Pratik Kishore</b> |       |         |

|                 |                                                      |              |
|-----------------|------------------------------------------------------|--------------|
| 16:05-16:20 Hrs | Venous sinus angiography Variations and Significance | Ashok Gandhi |
| 16:20-16:35 Hrs | Venous hypertension diagnosis, management            | Vikram Bohra |
| 16:35-16:50 Hrs | Discussion                                           |              |

### **Chairperson : Sumit Goyal, Bipan Sharma, Gaurav Goel, Wazid Nazir**

|                 |                                                      |                        |
|-----------------|------------------------------------------------------|------------------------|
| 16:50-17:05 Hrs | How do I decode a DAVF?                              | Srinivasan Paramasivam |
| 17:05-17:20 Hrs | How do I decode an AVM?                              | Anita Jagetia          |
| 17:20-17:35 Hrs | Simultaneous Embolization and excision of a bled AVM | Vikas Gupta            |
| 17:35-17:50 Hrs | Post-operative management of AVM Embolization        | Vineeta Goyal          |
| 17:50-18:05 Hrs | Discussion                                           |                        |

**Chairperson : Daljit Singh, Rajiv Anand, Vikas Gupta, Rajesh Kumar, Anita Jagetia, Gurbachan Singh**

|                 |                                                          |               |
|-----------------|----------------------------------------------------------|---------------|
| 18:05-18:20 Hrs | Beyond TICl3: the hidden burden of Futile Recanalization | Tushit Mewada |
| 18:20-18:35 Hrs | ICAD in Acute stroke                                     | Anand Alurkar |
| 18:35-18:50 Hrs | CTO when & how I do it                                   | Biplab Das    |
| 18:50-19:30 Hrs | GBM of NVSI                                              |               |

**Day 2 | Session -4**

| Time                                                                             | Topic | Speaker |
|----------------------------------------------------------------------------------|-------|---------|
| <b>Chairperson : Anand Alurkar, Anshu Mahajan, Shishir Pandey, Sushil Bhasin</b> |       |         |

|                 |                                                                                |                       |
|-----------------|--------------------------------------------------------------------------------|-----------------------|
| 9:00-9:10 Hrs   | Case presentation: Prepared for Rescue: Distal Cannulation in Aneurysm Coiling | Anantha Kumar         |
| 9:10-9:25 Hrs   | Case presentation: Glue Embolism into SSS During MMA Embolization              | Puranjay Pratap Singh |
| 9:25-9:40 Hrs   | Spinal vascular malformation organization and management                       | Trilochan Srivastava  |
| 9:40-9:55 Hrs   | Simple aneurysm coiling technique & pitfalls                                   | Daljit Singh          |
| 9:55-10:10 Hrs  | Management of multiple intracranial aneurysm                                   | Kaushik Sunder        |
| 10:10-10:25 Hrs | Discussion of all 4 presentations                                              |                       |
| 10:25-10:40 Hrs | Stent Assisted coiling: Atlas                                                  | Rashmi Saraf          |
| 10:40-10:50 Hrs | Case Presentation: Aneurysm Ground hog day FD coils and repeat                 | Sai Teja              |
| 10:50-11:00 Hrs | Discussion                                                                     |                       |

**Day 2 | Session -5**

| Time                                                                                          | Topic | Speaker |
|-----------------------------------------------------------------------------------------------|-------|---------|
| <b>Chairperson : Rahul Gupta, Arvind Nanda, Manish Chugh, Vinit Banga, Dinesh Kumar Satti</b> |       |         |

|                 |                                                                     |                  |
|-----------------|---------------------------------------------------------------------|------------------|
| 11:00-11:10 Hrs | Case Presentation: Spinal DAVF: Look beyond the segmental arteries. | Akshay Shirodkar |
| 11:10-11:25 Hrs | Stent-assisted Coiling in a Ruptured Aneurysm: Risks & Benefits     | Anshu Mahajan    |
| 11:25-11:40 Hrs | Management of Wide-Necked MCA Aneurysm: My Technique                | Sumit Goyal      |
| 11:40-11:55 Hrs | Contour - Real-World Experience & Long-Term Outcomes                | Nitin Dange      |
| 11:55-12:10 Hrs | My Indications for flow diverter                                    | Gaurav Goel      |
| 12:10-12:25 Hrs | Discussion                                                          |                  |

| Time                                                                           | Topic                                                  | Speaker           |
|--------------------------------------------------------------------------------|--------------------------------------------------------|-------------------|
| <b>Chairperson : Bipan Sharma, Nitin Dange, Mukesh Sharma, Satyendra Kumar</b> |                                                        |                   |
| 12:25-12:40 Hrs                                                                | Management Principles of a giant intracranial aneurysm | Anand Alurkar     |
| 12:40-12:55 Hrs                                                                | Blister Aneurysm                                       | Rashmi Saraf      |
| 12:55-13:10 Hrs                                                                | Posterior Circulation Aneurysm                         | Vikas Chandra Jha |
| 13:25-13:35 Hrs                                                                | Discussion                                             |                   |
| <b>13:35-14:05 Hrs Lunch Break</b>                                             |                                                        |                   |

## Day 2 | Session -6

| Time                                                                             | Topic                                                             | Speaker              |
|----------------------------------------------------------------------------------|-------------------------------------------------------------------|----------------------|
| <b>Chairperson : Vikas Chandra Jha, Abhinav Gupta, Sanjeev Gupta, Jyoti Bala</b> |                                                                   |                      |
| 14:05-14:20 Hrs                                                                  | Newer Guidelines for Mechanical Thrombectomy                      | Jyoti Bala           |
| 14:20-14:35 Hrs                                                                  | Tenecteplase an Indian wonder                                     | MV Padma             |
